

Miracle Cherry Frosting

Indica-dominant hybrid

ALOHA HUMBOLDT

Tart cherry, lemon peel, and minty greens harmonize on the nose and palate as you begin to smell and taste Miracle Cherry Frosting. This strain is incredibly complex as the secondary layers of savory herbs, eucalyptus, and earth softly appear as you continue to evaluate the flower. This strain is refreshing on the palate, as the terpenes limonene and pinene excite the senses. While not immediately apparent, there's also a creamy characteristic that provides balance to the aromas and flavors of the strain. Miracle Cherry Frosting is a great match with Cabernet Franc, particularly from a cooler climate such as Loire France, Argentina, or Chile, due to strain's tart cherry, savory herbs, earth and eucalyptus notes.
